

Mexx Eyes

Style 2618

The Mexx women's style 2618 is a true fashion statement: The distinctive square shape made from handcrafted acetate appears powerful yet feminine. A faceted upper line adds structure to the design, while an inlaid color accent—from the temple tip to the front temple—adds subtle sophistication. Trendy color combos like khaki with fuchsia make this frame the perfect companion for women with style, character, and an urban vibe. Mexx Eyes – Glasses for every day. For real people. For people who live life to the fullest, preferring authenticity to perfection.
